

Parent Teacher Association-2020

The objectives of the PTA Survey were to collect information on the role of the PTA of that particular school in different functions such as improvement in educational quality, mobilization of resources, school finance monitoring, relationship with community and local government, etc.

The interview was administered in Paper and Pencil Based Interview (PAPI) format. In order to protect confidentiality, eligible respondents were interviewed privately by a single interviewer. On average, the time for the PTA Survey interview lasted for 57.94 minutes. Each interviewer obtained verbal consent from each respondent participating in the PTA survey. All interviews were done face-to-face in Nepali.

Out of 114 eligible respondents, 108 PTA interviews were completed resulting in a 94.73% completion rate. In 3 schools, PTA was not formed. 3 interviews weren't completed which included 2 refusals, 1 outside of Nepal.

Principal investigator Prof. Dr. Dirgha Jibi Ghimire, Population Studies Center, University of Michigan, Executive Director, ISER-N; Co-investigator Prof. Dr. William G. Axinn, Population Studies Center, Survey Research Center, University of Michigan; and Co-investigator Prof. Dr. Brian Rowan, Institute for social research, Stanford University led the project.
